

*Graham Mackintosh*

*AI Industry Consultant*

*NASA/STC*

Graham Mackintosh is a pioneer in the field of advanced analytics, and has applied his thought leadership into multiple new domains for big data analysis, high performance cloud computing, AI and Deep Learning. He currently works as an AI consultant for NASA and the SETI Institute to provide technical and program management support across a range of space science domains, including the application of deep learning technologies to space weather, planetary defense and astrobiology. Prior to his current role as an AI consultant, Graham worked in the Emerging Technology division of IBM Corporation, and led successful AI initiatives at CERN, the SETI Institute, NASA Frontier Development Lab, and with the US Federal Government.
