

James Parr
Director, NASA Frontier Development Lab
CEO, Trillium Technologies

James is the founder and CEO of Trillium Technologies - a technology contractor that specializes in the application of emerging technologies to grand challenges, such as climate change, prevention strategies for cancer and obesity, deforestation mitigation, climate resilience and planetary defense from asteroids.

He is also Director of NASA's Frontier Development Lab (FDL) an AI research accelerator based in Silicon Valley (at the SETI Institute) and founder of the Open Space Agency (OSA) - which is dedicated to democratization of space exploration through citizen science and open hardware.

He lives in London with his wife and twin daughters.
